Contents of Volume 2

Methods & Designs

Some experiments with computer synthesized speech by P. B. Denes, 1

A transit-signal methodology for studying reaction time by R. Gottsdanker, 6

A test of the Battig procedure for controlling the level of individual item learning in paired-associate lists by A. J. Wearing and W. E. Montague, 9

The calibration of neutral density wedges by C. R. Ingling, Jr., 45

A geometric method for indexing stimulus relations in association by R. P. Allen, 48

Method of micro-analysis of sound films of behavior by W. S. Condon, 51

Sociotechnical design factors in remote instrumentation with humans in natural environments by R. L. Schwitzgebel and R. M. Bird, 99

Taste sensitivity in infrahuman species: Use of a genetic model to test the validity of alternative measures by T. W. Klein and J. C. DeFries, 106

Evaluation of unconstrained sorting data by C. T. Bersted, B. R. Brown, and S. H. Evans, 108

A runway for the cockroach by N. Longo, 118

Transients in "constant-current" generators by D. A. Ramsay, J. Z. Knapp, and J. C. Zeiss, 122

A nonparametric procedure for evaluation of true and false positives by I. Pollack, 155

Between-trial transporting of animals: A methodological consideration by D. J. Levis, 157

Probability gate statistics by J. N. Cronholm, 160

Matching behavior: Some methodological problems by M. R. D'Amato and W. O'Neill, 162

Imagery ratings for 338 nouns by H. J. Walker, 165

A telemetric method for measuring and recording head rotations in human infants by B. E. McKenzie and K. H. Sack, 173

Plexiglas helmet and catheter protection assembly for chronic intravenous administration of drugs in small primates by B. Talley and J. Trost, 175

A primate restraint and handling system for auditory research by D. B. Moody, W. C. Stebbins, and J. M. Miller, 180

An inherent problem in certain constant-current stimulators by J. J. Austin and F. A. King, 183

A multiple-choice airstream design for olfactory discrimination training of small animals by J. M. Williams and B. M. Slotnick, 195

EMG waveform duration: A validating method for the surface electromyogram by L. J. J. Bruno, J. Davidowitz, and R. F. Hefferline, 211

Tables of event sequences for sequential analyses of data in psychological experiments containing two-class events by W. E. Vandament, R. G. Burright, R. R. Fessenden, and W. H. Barker, 290

Instrumentation & Techniques

Effects of shock source and method of contact upon runway escape behavior by J. V. Lambert and L. J. Hammond, 11

An electronic audio switch by W. C. Small and D. G. Lutz, 14

The octopus in the laboratory: Handling, maintenance, training by J. J. Walker, N. Longo, and M. E. Bitterman, 15

The construction of a programmable olfactometer by K. Eyferth and K. Krueger, 19

The production and facing of entoptic images by R. J. Hall, R. Karsh, and W. E. Wilsoncroft, 22

A simple, all-mechanical operant apparatus by F. A. Logan and F. A. Logan III, 24

Grid vs subcutaneously delivered shock in escape schedules with guinea pigs by J. Khalili and C. Cheney, 25

A simple timing shutter for stimulus-presentation devices by W. Buchanan and R. F. Weiss, 28

A new approach to on-line, run-time program logic and error debugging using hardware implementation by R. S. Enabit, 33

A spectral analysis program for the processing of neuro-electric data by F. Urbano, S. G. Pauker, and F. R. Ervin, 37

Measurement of eye orientation of monkeys during visual discrimination by A. M. Schrier, M. L. Povar, and J. Vaughan, 55

An N-channel stroboscopic tachistoscope for typewritten stimuli by D. H. Lawrence and E. H. Sasaki, 63

The use of hypothermia in split-brain surgery on the rat by A. Cydell, 65

Analysis of arterial blood gases in the curarized, artificially respirated rat by L. V. DiCara, 67

A simple, inexpensive, constant-flow pump for delivering liquid reinforcers by B. T. Engel and R. E. Quilter, 70

The symmetrical maze: An automated closed-field test series for rats by J. W. Davenport, W. W. Hagquist, and G. R. Rankin, 112

A rapid method for permanent implantation of an intraoral fistula in rats by M. I. Phillips and R. E. Norgren, 124

The photo-lickerandum: A device for detecting the licking response, with capability for near-instantaneous programming of variable quantum reinforcement by N. W. King, D. R. Justesen, and A. D. Simpson, 125

On the use of the push-pull cannula as a means of measuring biochemical changes during ongoing behavior by H. A. Tilson and S. B. Sparber, 131

The semi-automatic Wisconsin general test apparatus by J. W. Davenport, A. S. Chamove, and H. F. Harlow, 135

Simulated unit pulses for calibrating by W. J. Mundl, 139

A pseudorandom noise generator for use in auditory research by L. L. Feth, 169

An electronic aid for presenting equivalent information in concept identification by P. Thorne, D. Arenberg, and G. Baartz, 186

A simple and inexpensive method to measure urinary excretion in nonhuman primates by C. E. Thomsen and L. H. Mendow, 188

An electroluminescent lamp device for critical flicker fusion and apparent motion by C. C. Brown and D. Krausman, 189

A restraint system for the psychophysiological study of dogs by D. E. Anderson, L. A. Daley, J. D. Findley, and J. V. Brady, 191

Relative aversiveness of subcutaneous shock and footshock in the rat by B. A. Campbell and W. H. Moorcroft, 222

A constant-current shock source for providing direct or alternating current output by R. A. Stewart and S. L. Campbell, 224

A solid-state cumulative recorder for an analog registry of accumulative events by D. T. Krausman, 228

Design and laboratory tests of a long-life FM transmitter for tagging small mammals by K. L. Jackman and R. C. Cowgill, 230

Air-puff-elicited startle: Habituation over trials and measurement of a hypothetical emotional response by P. F. Galvani, 232

A versatile apparatus for measuring the frequencies and durations of animal and

XUM

human responses by J. B. Sidowski and C. Spears, 235
Dynamic visuometric techniques by V. R. Putz, 240
A simple transmitter mount for short-term telemetric measurement of heart rate in the rat by T. Horvath, 246
A system for controlling the light output of a monochromator by any simple function and for temporally modulating the intensity by P. Rosen, M. W. Levine, M. Rosetto, and I. Abramov, 297
A self-adjustment procedure for measuring the visual acuity of rhesus monkeys by E. S. Graham, D. N. Farrer, G. H. Crook II, and P. V. Garcia, 301

Computer Technology

Computerizing the activities of subjects for psychological research at a large university by B. J. Starr, 29
Variants of basic black computer interfaces by R. S. McLean, 31
Proceedings: DECUS conference—Neurophysiology and psychophysiology session: Foreword by C. F. Stroebel, 74
"Why a LINC?" by S. M. Ornstein, 75
Comparison of the LINC, LINC-8, and PDP-12 computers by R. J. Clayton, 76
LINC computer application to research on behavioral correlates of evoked neuroelectric potentials of the brain by W. R. Goff and G. D. Goff, 77
Computer techniques for studying biologic rhythms: Quantitative chronobiology by C. F. Stroebel, 79
Computer automated procedures for assessing some experiences of family membership by W. H. Sheriff, Jr., 82
DECUS discussion, 84
An event-coder for evoked potential studies by E. Donchin and N. Pappas, 142
On-line FORTRAN for the PDP-8 by R. N. Haber, S. H. Berry, and R. Uhlman, 248
Minicomputers by J. B. Sidowski, 267

Printout

Printout by J. B. Sidowski, 40, 88, 145, 199, 255, 308

Briefs

On using the ASR-33 Teletype by E. Shimoff, 91
Activity meter by A. B. Farad, 91

Notes

A simple valve for liquid reward systems by M. H. Kellicutt and M. I. Boisen, 92
An automatic system for measuring average R-R interval by K. R. Zurn, 93
A transition from an electrode to coaxial cable by A. H. Frey, 94
Increasing the versatility of the Scientific Prototype 3-channel tachistoscope by M. H. Rowe and J. H. Sandweiss, 95
Superphosphate in the control of vivarium odor by T. B. Collins and M. D. Harless, 95
A suit for protecting chronically implanted devices in monkeys by E. E. Davis and T. L. Jones, 96
A table of Kamin CER ratios by P. A. Holmes and R. E. Boardman, 151
Decoding back-projected slides by means of photocell-operated logic by W. S. Beamon and E. S. Geller, 204
Sex-typing newborn rats: An improved procedure with Agouti strains by F. P. Valle, and D. B. Allen, 205
A method of programming concurrent response opportunity on FI schedules with changeover holdoffs by J. N. Coulbourn, 207
A well-regulated constant-current shocker by J. Bintz, 258
A device to prevent fence sitting in shuttle avoidance by J. Bintz, 259
The use of canine plasma protein solution in the laboratory rat by D. Fitzpatrick and F. P. Gullotta, 259
An inexpensive surface-mounted cannula(e) for the study of spreading cortical depression by W. P. Brittain, D. K. Zwemke, and G. L. Bugg, 260
An inexpensive brine shrimp dispenser for fish by R. E. Davis and M. S. Hirtzel, 262
An instrument to produce surface colors of continuously variable brightness by S. Coren, 263
A magnetic-tape programmer by T. J. Teyler, 264
An inexpensive photosensor using a light-activated SCR by D. S. Malcolm, 313
Apparatus for determining cage tilt thresholds in small animals by J. E. Roecklein and S. M. Hickman, 314
The Paradome: An outdoor laboratory for testing children by S. I. Shapiro and B. E. Moely, 315
A system for presenting visual indication of heart rate by K. R. Zurn, 316
